

Streamlining Training Management for District Schools

About the Client

A prominent educational organization, faced significant challenges in managing training across various district schools. Their primary goals included controlling the training imparted to different schools from a single platform and ensuring that users (teachers, students, and school admins) view training information tailored to their roles.

Challenges

Geographical Diversity:

Managing training across widely dispersed schools made effective delivery and administration difficult.

Low User Motivation:

There was a significant lack of engagement and motivation among students and teachers, hindering training effectiveness.

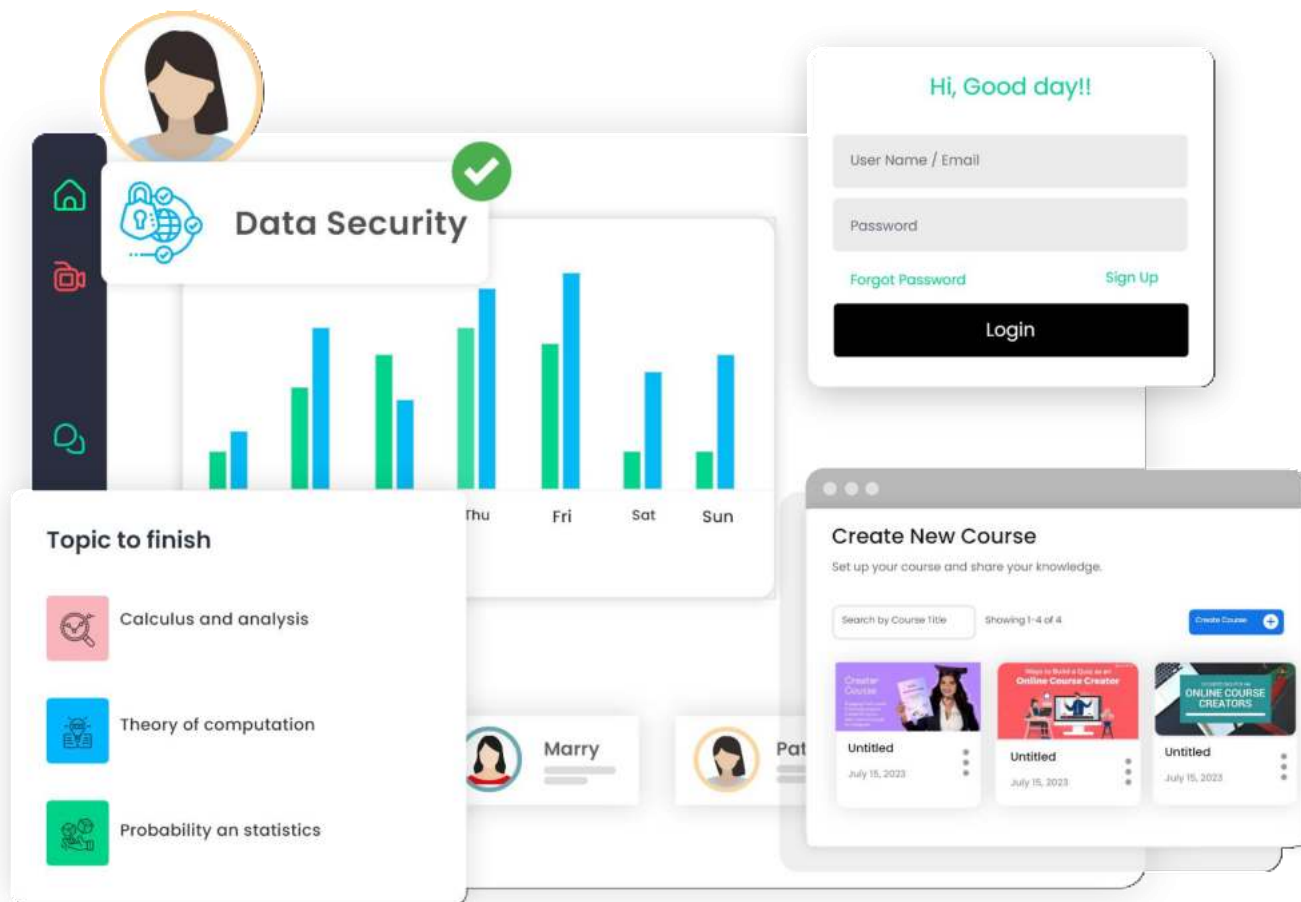

Data Management Issues:

Consolidating reports and obtaining advanced analytics to evaluate training effectiveness were critical needs.

Need for Customization:

The Client required a branded LMS with a customized class structure reflecting their system in Clever SIS.

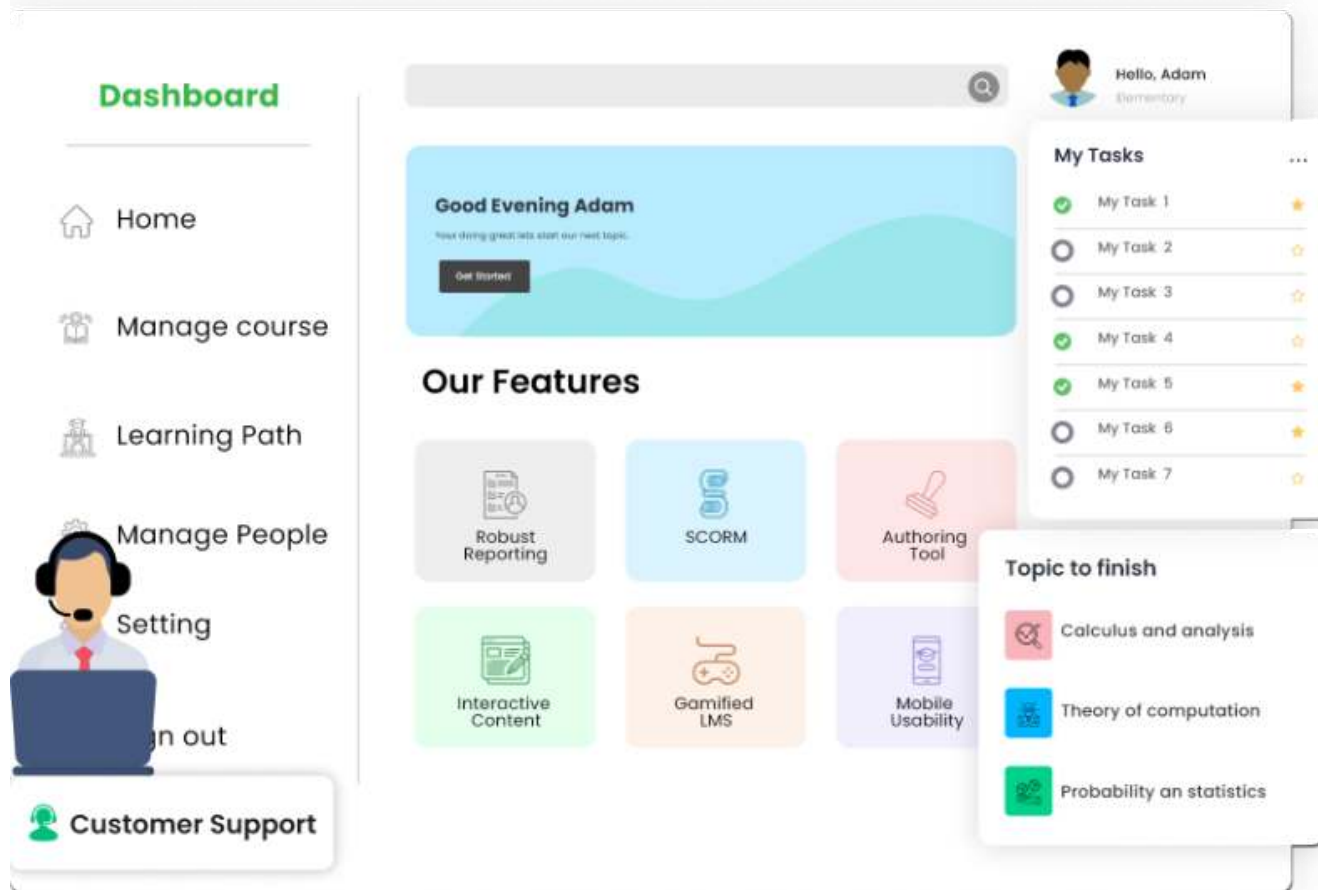

Solutions

Single Sign-On (SSO):

Enabled easy access across platforms with one login, reducing password issues and enhancing user experience.

Solutions

Multi-Tenant Structure:

Allowed each school to operate independently within the LMS, providing centralized control and quick setup for new schools.

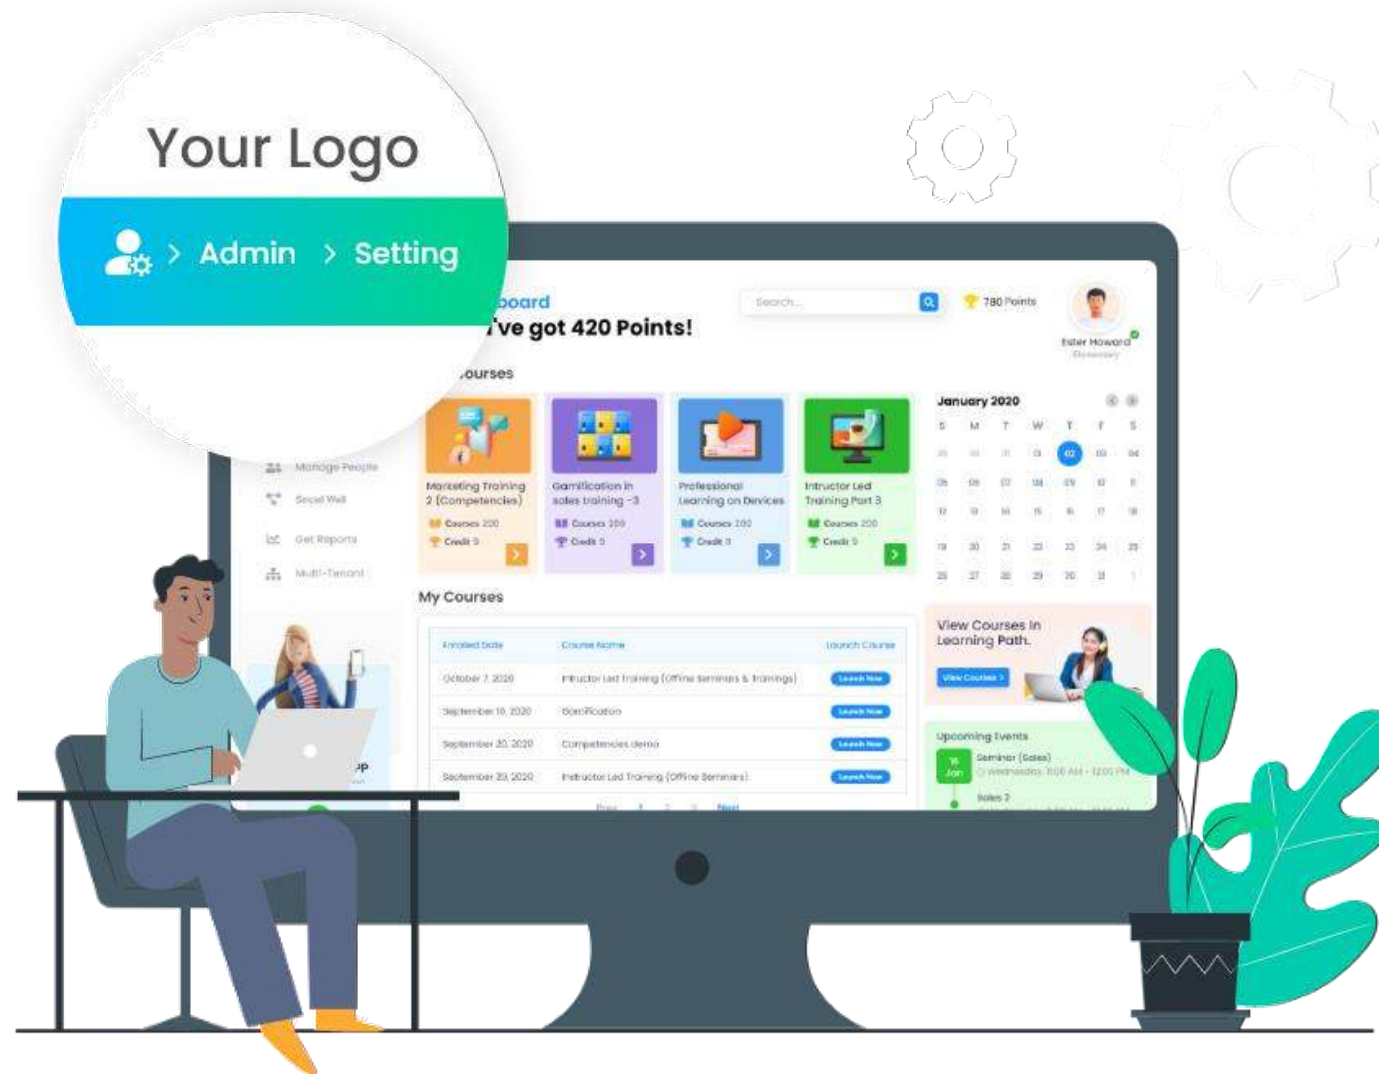

Solutions

Real-Time User Synchronization:

Automatically created and updated user profiles from Clever SIS in the LMS, streamlining administration.

Custom Branding:

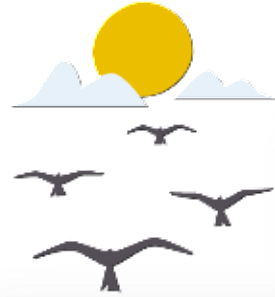

Adapted the LMS to match the Clients brand, including tailored features and gamification for better engagement.

Solutions

Engagement Tools:

Incorporated features like leaderboards, educational games, and interactive videos to boost user motivation and participation.
